

Jen-Inn Chyi received the B.S. and M.S. degrees in electrical engineering from National Tsing-Hua University, Taiwan, in 1982 and 1984, respectively, and the Ph.D. degree in electrical engineering from the University of Illinois, Urbana-Champaign, in 1990. In 1991, he joined National Central University, where he is currently Chair Professor of the Department of Electrical Engineering, and Vice Chancellor of the University System of Taiwan.

His research interests are in the areas of III-V semiconductor devices, including III-V CMOS devices, tunnel FETs, quantum dot photonic devices, and GaN-based devices. He has authored and co-authored over 350 journal papers and been granted over 60 patents. He has received several prestigious awards for his academic achievements as well as contributions to industry. These awards include the Distinguished Research Award of the National Science Council three times, the Distinguished Professor Award of the Chinese Institute of Electrical Engineering, the Industrial Contribution Award of the Ministry of Economic Affairs, the Distinguished Technology Transfer Award of the National Science Council, and the Outstanding Researcher Award of Pan Wen Yuan Foundation. Dr. Chyi is a member of Phi Tau Phi, and Fellow of IEEE and SPIE.
